Journal Index - by Volume

VOLUMES V, VI

VOLUME V – NO. 1 [Oct./Nov. 1966]

COHERENCE THEORY SOLUTION TO THE PINHOLE CAMERA
3 George O. Reynolds and John H. Ward, Technical Operations Research

IMAGING MICRODENSITOMETER
9 Jacob Rotstein, and Robert R. Billups, MIT/Lincoln Laboratory

OPTICAL CONSIDERATIONS FOR VIEWING LASER OPERATIONS
13 R. W. Dyer, Western Electric Co., Inc.

ANALYSIS OF OPTICAL DETERMINATION OF DETONATION VELOCITY IN SHORT CHARGES
18 A. Robert Clairmont, Jr., and Irving Jaffe, U.S. Naval Ordnance Laboratory

MOBILE CINETHEODOLITE MOUNT
22 Richard W. Bullard, Optics Division, Instrumentation Development Directorate

PHYSICAL OPTICS NOTEBOOK, ARTICLE 11 - PARTIAL COHERENCE–– TERMINOLOGY
28 Dr. George B. Parrent, Jr., and Dr. Brian J. Thompson

GULF STREAM TO BE BOMBARDED WITH SILVERY POWDER AND RED DYE
38 R. W. Dyer

PHOTO-OPTICS NOTE BOOK, ARTICLE 13 – OPTICAL FORMULARY
41 Herman C. Schepler

VOLUME V – NO. 2 [Dec. 1966/Jan. 1967]

A DIGITAL LASER RANGEFINDER FOR DATA ACQUISITION
47 Dr. Julian L. Thompson and Thomas R. Stoner, U.S. Naval Ordnance Test Station

A VERSATILE PHOTO-OPTICAL SYSTEM FOR THE STUDY OF BALLISTIC PHENOMENA
54 Stanley D. Tanenholtz, U.S. Army Natick Laboratories, Pioneering Research Division

CHARACTERISTICS AND APPLICATIONS OF VIDICON SCAN CONVERTERS
58 Robert P. Moore, Charles A. Hawthorne and Charles A. Ashwood, U.S. Naval Ordnance Lab

V-ANGLE FILM READER
63 Frank L. Jennings, Link Group, General Precision, Inc.

EXPOSURE PARAMETER NOMOGRAPHY
69 Kermit L. Sandefur, Technical Specialist Group, Hycon Manufacturing Company

PHYSICAL OPTICS NOTEBOOK – ARTICLE 12 – DIFFRACTION AND INTERFERENCE WITH PARTIALLY COHERENT LIGHT
74 Dr. George B. Parrent, Jr., and Dr. Brian J. Thompson

PHOTO-OPTICS NOTE BOOK – ARTICLE 14 – OPTICAL FORMULARY
85 Herman C. Schepler

VOLUME V – NO. 3 [Feb./Mar. 1967]

TWO HIGH-SPEED DIMENSIONAL MEASURING SYSTEMS
91 Till K. Dehmel, Product Test Laboratory, International Business Machines Corporation

A NEW FILM-MONOBATH COMBINATION FOR OSCILLOGRAPHY
95 John C. Barnes, Wilfred J. Moretti, and Donald G. Bushman, Research Laboratories, Eastman Kodak Company

RECENT DEVELOPMENTS IN FLASH X-RAY SYSTEMS
100 Kenneth E. Smith, Field Emission Corporation

THE USE OF INTERFEROMETER TECHNIQUES TO MEASURE TRANSDUCER SURFACE BEHAVIOR
104 Frederick H. Brustman, United Aircraft Research Laboratories

AN INFRARED IMAGING SYSTEMS FOR LAUNCH AND RE-ENTRY MEASUREMENTS
107 Edward F. Cross and Lyn H. Skolnik, Electronics Research Laboratory, Aerospace Corporation

114 Dr. George B. Parrent, Jr. and Dr. Brian J. Thompson

PHOTO-OPTICS NOTE BOOK – ARTICLE 15 – OPTICAL FORMULARY
133 Herman C. Schepler

VOLUME V – NO. 4 [Apr./May, 1967]

USE OF THE ISODENSITRACER FOR PICTORIAL DATA
139 Carlton S. Miller, Technical Operations Research

SUPER ELLIPTICAL ZONE PLATES
147 Gary S. Waldman and Kenneth I. Clifford, Electronics and Space Division, Emerson Electric Company

CRITICAL PARAMETERS AND METRIC PERFORMANCE OF IMAGE ORTHICON TUBES
150 Walter E. Woehl, Optical Research Physicist, Air Force Systems Command, Missile Development Center

SPATIAL FREQUENCY RESPONSE OF FLYING-SPOT-SCANNER SYSTEMS
155 Carl F. Shelton, Federal Systems Division, International Business Machines Corporation

PHYSICAL OPTICS NOTEBOOK – ARTICLE 14 – COHERENT IMAGING-RESOLUTION
162 Dr. George B. Parrent, Jr. and Dr. Brian J. Thompson

PHOTO-OPTICS NOTEBOOK – ARTICLE 16 – OPTICAL FORMULARY
177 Herman C. Schepler

VOLUME V – NO. 5 [June/July, 1967]

RAPID-ACCESS PROCESSING OF CATHODE-RAY-TUBE RECORDING FILM
181 J.C. Barnes, J.R. Moran and R.C. Salsich, Research Laboratories, Eastman Kodak Company

THREE DIMENSIONAL HOLOGRAM RECONSTRUCTION AND IMAGE SPECKLE
188 John B. DeVelis, Merrimack College; George O. Reynolds, Technical Operations Research

IMAGING SYSTEM ASPECTS OF AN UNMANNED GROUND-VIEWING SATELLITE
191 Sol Zwirn, Advanced Space Stations & Planetary Systems, McDonnell Douglas Missile & Space Systems Division

UTILIZATION OF S-10 & S-20 IMAGE ORTHICON SYSTEMS FOR RADIOMETRIC MEASUREMENTS
196 Richard L. Gulatsi, Missile and Space Division, Space Sciences Laboratory, General Electric Company

THE MULTIPLE SCAN CORRELATOR
202 James Wharry, Mitchell Camera Corporation

PHYSICAL OPTICS NOTEBOOK – ARTICLE 15 – COHERENT IMAGING-EXAMPLES
206 Dr. George B. Parrent, Jr. and Dr. Brian J. Thompson

PHOTO-OPTICS NOTEBOOK – ARTICLE 17 – OPTICAL FORMULARY
223 Herman C. Schepler

VOLUME VI – NO. 1 [Oct./Nov. 1967]

THE ESTABLISHMENT OF STANDARDS IN PHOTO-OPTICAL INSTRUMENTATION
3 Dr. Francis E. Washer, Metrology Division, Institute for Basic Standards, U.S. Department of Commerce

FIBER OPTICS APPLICATIONS AND FABRICATION TECHNIQUES
6 James D. Cope and Herman E. Brown, Defense Research Laboratory, The University of Texas

OPTIMIZING PHOTOGRAPHY THROUGH THE ATMOSPHERE
9 Dr. P.G. McManigal, Dr. J.H. Atkinson and J.D. Pembrook, Aeronutronic Division, Philco-Ford Corporation

THE STEREOPTIPLEXER
14 Robert B. Collender, Reconnaissance Subsystems, Lockheed Aircraft Corporation

PHYSICAL OPTICS NOTEBOOK – ARTICLE 16 – SUMMARY AND CONCLUSIONS
20 Dr. George B. Parrent, Jr. and Dr. Brian J. Thompson

PHOTO-OPTICS NOTEBOOK – ARTICLE 18 – OPTICAL FORMULARY
33 Herman C. Schepler

VOLUME VI – NO. 2 [Dec. 1967/Jan. 1968]

PHOTO-OPTICS NOTEBOOK – ARTICLE 19 – OPTICAL FORMULARY
42 Herman C. Schepler

CONSIDERATIONS FOR FIBER OPTIC APPLICATION TO CATHODE RAY TUBES
44 Andrew A. Mueller, Chicago Aerial Industries

FIBER OPTIC MULTIPLE FIBERSIGMOIDOSCOPE
49 William E. Reynolds, Seymour Bazell, Anatoli Brushenko and Donald A. Pontarelli, Illinois Institute of Technology, Research Institute

A NEW CINEDENSITOMETER FOR RAPID ANALYSIS OF RE-ENTRY OBSERVABLES
54 Dr. Andrew Guttman, Burton Breznick and Raymond H. Lambert, General Electric Company, Space Sciences Laboratory

THE SANTA BARBARA UNDERWATER PHOTO-OPTICS SEMINAR IN RETROSPECT
65 Alexis B. Dember, Seminar Chairman, U.S. Naval Missile Center

VOLUME VI – NO. 3 [Feb./Mar. 1968]

PHOTO-OPTICS NOTE BOOK – ARTICLE 20 – OPTICAL FORMULARY
82 Herman C. Schepler

A HIGH RESOLUTION, HIGH SENSITIVITY COLOR SCHLIEREN METHOD
85 Paul H. Cords, Jr., U.S. Naval Ordnance Laboratory

SPIE SEMINAR HIGHLIGHTS – PHOTO-OPTICAL SYSTEMS EVALUATION
89 Dr. Brian J. Thompson, Technical Operations West

IMAGE PROCESSING WITH MULTIAPERTURE IMAGE DISSECTOR
93 James M. Abraham, Dr. Clive E. Catchpole and George W. Goodrich, The Bendix Corporation, Research Laboratories Division

RADOT––A NEW SYSTEM FOR OPTICAL RANGE INSTRUMENTATION
97 John F. Nicola, Kentron Hawaii Ltd.

VOLUME VI – NO. 4 [Apr./May, 1968]

PHOTO-OPTICS NOTEBOOK – ARTICLE 21 – OPTICAL FORMULARY
114 Herman C. Schepler

DESCRIPTION OF A RANGE, AZIMUTH AND ELEVATION DETECTOR OF OPTICAL TARGETS
117 Herman E. Brown, James D. Cope and R.A. Bond, University of Texas, Defense Research Laboratory, Military Physics Division; A. C. Cobb, Target and Scorers Branch, Air Force Armament Laboratory

REAL TIME DIGITAL SUBTRACTION AND ENHANCEMENT OF VIDEO PICTURES
120 Dr. Thomas J. Janssesn, Gregory C. Kozlowski, Capt. Alexander Luther, Aerospace Corporation

HIGH SPEED CAMERA STUDIES OF A GIANT PULSE LASER
125 Dr. Elias Reisman and G.D. Cumming, Applied Research Laboratories, Philco-Ford Corporation, Aeronutronic Division

GLASS/PLASTIC FIBER TRANSMISSION CHARACTERISTICS
128 Donald A. Pontarelli, O. Harry Olson, and Anatoli Brushenko, Illinois Institute of Technology Research Institute; Arthur C. Menadier, Poly-optics, Inc.

AN EXPANSION OF THE EV SYSTEM
132 Walter F. Lindsey, NASA Langley Research Center

VOLUME VI – NO. 5 [June/July, 1968]

PHOTO-OPTICS NOTEBOOK – ARTICLE 22 – OPTICAL FORMULARY
150 Herman C. Schepler

ASTRONOMY FROM ORBIT
152 J. W. Wechsler, Space Station Subsystem Analysis, Advance Space Stations and Planetary Systems, Space Systems Center, McDonnell Douglas Corporation

PHOTOGRAPHIC PHOTOMETRY MEASUREMENTS––ASSOCIATED WITH THE INTERPRETATION OF POINT OBJECT RADIANT INTENSITY
157 C.J.C. Thompson, Electro-Optics Branch, Advance Electronics Department R & D, McDonnell Douglas Corp.

PHOTOMULTIPLIER DETECTION SYSTEM––DESIGN AND APPLICATIONS FOR ARTIFICIAL METEORS
166 Wendell G. Ayers, NASA Langley Research Center

THIN PROBE PULSED LIGHT PHOTOMETER––CALIBRATION AND MEASUREMENT OF TIMING LIGHT SOURCES IN THE FIELD AND ON THE RANGE
171 LeRoy M. Dearing and Robert E. Hiller, L.M. Dearing Associates, Inc.

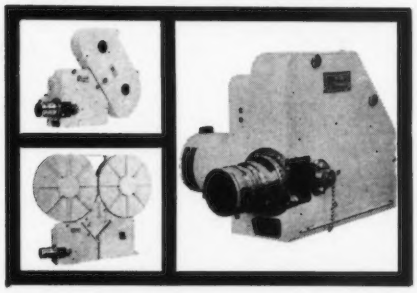
Here's what they say about the versatile Photokinetics "NOVA" high speed movie camera



"Before purchasing Nova cameras, we tested all the leading cameras in detail. We selected the Nova for a number of reasons."

"We are pleased to report that the rocket sledge trial went extremely well and the cameras performed satisfactorily. This compares favorably with two previous trials in which other types of high speed cameras failed."

You can get from 10 pps to 8,500 pps from the basic 100′ camera; 10 to 10,000 pps with the 400′ magazine; and go to 5,000 pps—with infinitely variable controlled speed to 2% (patented)—with the 1200′ magazine. The 16mm prism assembly is interchangeable with ½ frame, ¼ frame, and streak prisms for frame rates up to 40,000 pps and 3000 inches per second in the streak mode—uses standard or thin base films—complete line of lenses and accessories are available SALES, SERVICE, RENTALS. Free brochure mailed on request. SEND FOR NAME OF YOUR LOCAL REPRESENTATIVE.
